

Ideation Phase

Define the Problem Statements

Date	12 July 2026
Team ID	N/A
Project Name	HouseHunt – Smart Real Estate Rental Platform
Maximum Marks	2 Marks

Customer Problem Statement Template:

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive

PS	I am (Customer)	Trying to	But	Because	Which makes me feel
PS-1	A tenant looking for a rental property	Find a suitable house quickly with complete property details	Property information is scattered across different platforms and brokers	Existing platforms do not provide verified listings, reviews, maps, and owner contact details in one place	Frustrated and unsure about making the right choice
PS-2	A property owner	Advertise my property and manage tenant inquiries efficiently	Handling property listings, visit requests, and communication manually is time-consuming	There is no centralized platform to manage listings, scheduled visits, and interested tenants	Overwhelmed and less productive
PS-3	A platform administrator	Monitor users, properties, reviews, and visit requests from a single dashboard	Platform data is spread across multiple modules	There is no unified system to track platform activities and user engagement efficiently	Less confident in managing the platform effectively

How HouseHunt Addresses These

PS-1 → HouseHunt provides verified property listings with advanced search, filters, maps, reviews, wishlist, and direct owner contact for an easy property search experience.

PS-2 → Property owners can efficiently manage listings, schedule visits, communicate with tenants, and track all activities through a personalized dashboard.

PS-3 → The platform offers centralized management with secure authentication, property monitoring, visit management, and scalable administration for smooth system operation.
