

Project Design Phase-II Data Flow Diagram & User Stories

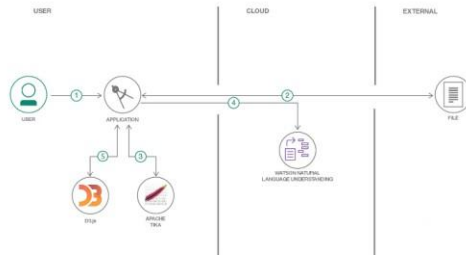

Date	14 July 2026
Team ID	N/A
Project Name	HouseHunt – Smart Real Estate Rental Platform
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

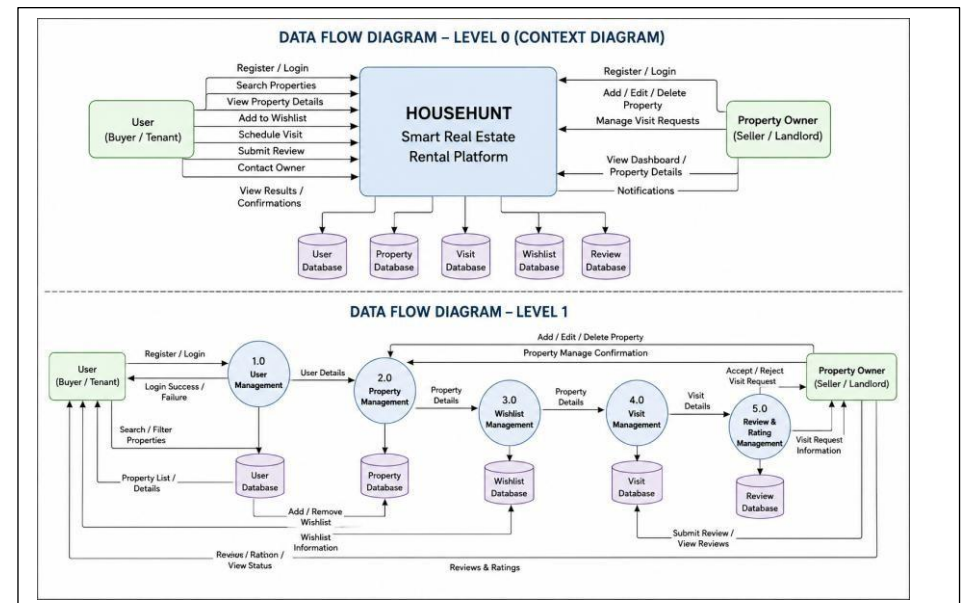

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Level-0 and Level-1 DFD (Context Diagram)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Customer (Web User)	Registration	USN-1	As a user, I can register by entering my name, email, phone number, and password.	User account is created successfully and dashboard is accessible.	High	Sprint-1
Customer (Web User)	Login	USN-2	As a user, I can log in using my email and password.	User can securely access the application.	High	Sprint-1
Customer (Web User)	Property Search	USN-3	As a user, I can search properties by location.	Matching properties are displayed.	High	Sprint-2
Customer (Web User)	Property Filters	USN-4	As a user, I can filter properties by price, bedrooms, and bathrooms.	Filtered property list is displayed correctly.	High	Sprint-2
Customer (Web User)	Property Details	USN-5	As a user, I can view complete property details.	Property information, owner details, and map are displayed.	High	Sprint-2
Customer (Web User)	Wishlist	USN-6	As a user, I can add properties to my wishlist.	Selected property appears in the wishlist.	Medium	Sprint-3
Customer (Web User)	Visit Scheduling	USN-7	As a user, I can schedule a visit for a property.	Visit request is successfully created.	High	Sprint-3
Customer (Web User)	Reviews & Ratings	USN-8	As a user, I can submit ratings and reviews.	Review is saved and displayed.	Medium	Sprint-3
Customer (Web User)	Contact Owner	USN-9	As a user, I can contact the owner via Email or WhatsApp.	Email or WhatsApp opens with the owner's contact details.	Medium	Sprint-3

Property Owner	Property Management	USN-10	As a property owner, I can add new property listings.	Property is successfully added to the platform.	High	Sprint-2
Property Owner	Property Management	USN-11	As a property owner, I can edit or delete my property listings.	Changes are saved or the property is removed successfully.	High	Sprint-2
Property Owner	Dashboard	USN-12	As a property owner, I can manage my properties from a dashboard.	Dashboard displays all owned properties and statistics.	High	Sprint-4
Property Owner	Visit Requests	USN-13	As a property owner, I can accept or reject visit requests.	Visit status is updated successfully.	High	Sprint-4
Administrator	System Management	USN-14	As an administrator, I can monitor users and property data.	System records and data are managed successfully.	Medium	Future Release
