

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	13 July 2026
Team ID	N/A
Project Name	HouseHunt – Smart Real Estate Rental Platform
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form (Name, Email, Phone Number, Password) Secure password encryption using bcrypt
FR-2	User Authentication	Login using Email and Password JWT-based Authentication
FR-3	Property Management	Add Property Edit Property Delete Property Upload Property Image
FR-4	Property Search	View All Properties Search by Location Filter by Price, Bedrooms, and Bathrooms
FR-5	Property Details	View Complete Property Information View Property Location on Google Maps View Owner Details (Name, Email, Phone)
FR-6	Wishlist Management	Add Property to Wishlist View Wishlist Remove Property from Wishlist
FR-7	Visit Scheduling	Schedule Property Visit View Scheduled Visits Accept/Reject Visit Requests
FR-8	Reviews & Ratings	Submit Property Rating Submit Property Review

		View Reviews and Ratings
FR-9	Owner Communication	Contact Owner via Email Contact Owner via WhatsApp
FR-10	Dashboard	View Dashboard Statistics Manage Properties View Visit Requests Quick Action Buttons

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application provides a simple, intuitive, and responsive user interface that enables users to easily register, search properties, schedule visits, and manage listings.
NFR-2	Security	User authentication is secured using JWT tokens, passwords are encrypted using bcrypt, and authorized users can only access protected resources.
NFR-3	Reliability	The system ensures consistent performance by handling exceptions, validating user inputs, and maintaining accurate property and user data.
NFR-4	Performance	The application delivers fast response times for property search, filtering, dashboard loading, and CRUD operations with efficient database queries.
NFR-5	Availability	The system is designed to be available 24x7, allowing users to access property listings and services anytime with an internet connection.
NFR-6	Scalability	The MERN stack architecture allows the application to scale easily by supporting more users, properties, and additional features such as AI recommendations, online payments, and mobile applications.
